PROFESSIONAL SUMMARY

Frontend Developer | React.js & Next.js – Driven frontend developer with 1.8+ years of experience building fast, responsive, and intuitive web applications. Skilled in React.js, Next.js, and modern frontend tools, delivering clean code and seamless user experiences. Passionate about turning ideas into engaging digital products.

TECHNICAL EXPERTISE

- **Languages & Markup:** JavaScript (ES6+), HTML5, CSS3, SCSS
- **Frontend Frameworks & Libraries:** React.js, Next.js
- **State Management:** Redux, Context API
- **Routing & Navigation:** Next.js Routing, Dynamic Routes, Server-Side Rendering
- **Animations:** GSAP, Framer Motion
- **Tools & Version Control:** Git, GitHub, npm
- **Additional Skills:** Authentication, Real-time Chat (Socket.IO, JWT), API Integration, Payment Gateway Integration (Stripe), Formik & Yup
- **Learning / Exploring:** Node.js & Express, MongoDB

EXPERIENCE

Par Solution

Software Developer - Surat, Gujarat

01/2024 - Present

- Built responsive web apps using React.js, Next.js, and Redux with dynamic routing and SSR for high performance.
- Integrated REST APIs with Axios and implemented robust form validations using Formik and Yup.
- Implemented secure authentication including email/password and Google OAuth.
- Developed real-time chat systems using Socket.IO and JWT, enabling seamless user communication.
- Crafted interactive UI animations with GSAP and Framer Motion, enhancing user engagement.
- Optimized app performance and ensured smooth cross-device UX.
- Maintained clean, modular, and reusable code for scalability and maintainability.

KEY PROJECTS

Title: Bitcorpen

Technologies Used: Next.js, Node.js, Express, MongoDB

Description: Developed a professional networking platform similar to LinkedIn, enabling users to search for jobs, connect with recruiters and influencers, and manage profiles effectively. Key contributions include:

- Engineered advanced real-time chat functionality with multiple chat windows for simultaneous conversations.
- Implemented group chats for multi-user interactions similar to WhatsApp.
- Created a global socket connection to maintain chat continuity across all routes.
- Integrated real-time message updates for a seamless and interactive user experience.
- Added a Stripe subscription system to enable premium features.

- Implemented an affiliate system to support referrals and enhance user engagement.
- Connected APIs for smooth full-stack functionality, delivering a highly interactive platform for all user types.

Title: Taylor Sterling

Technologies Used: Next.js, React, SCSS, GSAP, Framer Motion, View Transitions API, Lenis, Intersection Observer API

Description: Built a high-impact, animation-driven website for an executive recruitment brand, delivering a smooth and visually engaging user experience.

- Implemented advanced page-transition animations using View Transitions API for seamless route changes.
- Created rich, interactive animations with GSAP and Framer Motion, elevating overall UI/UX.
- Used Intersection Observer API to trigger on-scroll animations and lazy loading efficiently.
- Integrated Lenis for ultra-smooth scrolling across all sections.
- Developed a dynamic blog system with Next.js dynamic routing, allowing unique URLs for each post.

Odyssey – Project Review System

Technologies Used: Next.js, React, SCSS, Recharts, Ant Design, Node.js, Express, MongoDB

Description: Designed and developed a role-based project review platform enabling tailored dashboards and performance tracking for employees, team leads, managers, sales teams, and CEOs.

- Built dynamic dashboards displaying assigned projects, progress tracking, and performance graphs using **Recharts** for year-over-year insights.
- Implemented hierarchical review workflows: managers review employees, manager leads review managers, and CEOs can view and assess any user's performance.
- Enabled CEOs to set monthly sales targets and search any user profile for detailed metrics.
- Developed project assignment and review management features with secure role-based access control.
- Utilized **Ant Design** tables and modular **SCSS** for clean, responsive UI components and smooth user experience.

EDUCATION

Bachelor of Technology in Computer Engineering

Bhagwan Mahavir College of Engineering & Technology - Surat, Gujarat (CGPA: 8.67)
