

Vivek Solanki

 Vivek-Profile  Vivek  vivek.s171202@gmail.com  2673017876  Philadelphia, PA

PROFESSIONAL SUMMARY

Master's student in Computational Data Science with hands-on experience in software development, cloud technologies, and data-driven applications. Proficient in Python, React, Django, AWS, and SQL, and actively seeking opportunities in Software Engineering, Data Science, Machine Learning, and Cloud Engineering.

EMPLOYMENT

CLASSROOM TECHNOLOGY SUPPORT SPECIALIST

Aug 2025 – Present | Philadelphia, PA

Temple University, Philadelphia, PA 

- Resolved **20+ weekly** technology support requests (hardware, software, network, AV) with **95%+ on-time resolution rate**, supporting uninterrupted classroom instruction.

FRONTEND DEVELOPER INTERN

Feb 2024 – May 2024 | Surat, India

GatiSofttech 

- Developed responsive **Angular** web applications in collaboration with senior developers, translating wireframes into user-friendly UI components while ensuring **cross-browser compatibility** and responsive design.
- Independently designed and developed a frontend website as an undergraduate capstone project, applying modern web development and **UI/UX principles** while identifying and resolving **10+ frontend** defects to improve functionality and user experience.

PYTHON DATA ANALYST INTERN

Jan 2023 – Jan 2024 | Surat, India

JR Dreams 

- Preprocessed and analyzed **45k+ records** using Python; improved data completeness by **40%**, **enabling cleaner ML model inputs**.
- Debugged data pipelines; reduced data errors from 20 to 5 per week through automation, saving **8+ engineering** hours weekly.

EDUCATION

M.S. in Computational Data Science

Jan/2025 – Present | Philadelphia, PA

Temple University

- Graduate Coursework: Data Structure and Algorithms, Programming Technique, Principle of Data Management, Machine learning, Data-Intensive and Cloud Computing, Topics in Computer Science (AGI), Design and Analysis of algorithm, Computer Vision, knowledge Discovery and Data Mining

Bachelor of Technology in Computer Engineering

May/2024 | Surat, GJ, India

Bhagavan Mahavir University

TECHNICAL SKILLS

Problem Management: Python, JavaScript, SQL, Cypher

Backend & Frameworks: Django, Node.js, Express.js, FastAPI

Frontend: React, Next.js, Angular

Data & ML: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Matplotlib, Seaborn

Databases & Storage: MongoDB, Neo4j, AWS S3

Cloud & DevOps: AWS EC2, S3, Lambda, Boto3, Git, Linux

Tools: VSCode, BeautifulSoup, Selenium, Jira

PROJECTS

Lyra.ai — AI Text-to-Speech Platform

- Designed and developed **Lyra.ai**, an AI text-to-speech platform enabling users to create multilingual, human-like voiceovers for videos, podcasts, and presentations.
- Engineered a scalable full-stack solution using **Next.js, React, Node.js, Express, and MongoDB**, delivering seamless user experiences and end-to-end functionality.

Customer Segmentation — Data Analytics

- Developed a customer segmentation model using **Python, Pandas, and Scikit-learn**, processing **50,000+ transactions** and creating **10 RFM-based features** for customer behavior analysis.
- Implemented **K-Means clustering** and cluster validation techniques to identify **three high-value customer segments**, enabling data-driven marketing and customer retention strategies.

Cloud Image Processing — AWS & Django Backend

- Developed a **Django** image processing application with 6 real-time filters (grayscale, sepia, blur, edge detection, posterize, solarize) using PIL, storing processed images in Amazon S3 for scalability.
- Architected and deployed the full stack to **AWS EC2** with **S3 integration** for distributed media storage, managing cloud infrastructure, **IAM permissions**, environment configuration, and production deployment across multiple AWS services.
